A director listing all the drugs recommended and available for prescribing in Australia.

**Drug monograph:** A drug monograph is produced once the drug product has been registered and is available on the market. It provides the name of the substance, its therapeutic use, package, storage and labelling requirements.

**Drug interactions:** A pharmacologic response due to the presence of another drug, herbal medicine, food, drink or some environmental agent.

**Clinical practice guidelines:** These are developed to help practitioners make decisions regarding appropriate health care for specific clinical circumstances. It consists of a list of conditions and diseases, and the drugs used to treat them.

**Point-of-care tools:** Information tools that provide health care professionals with synthesised evidence to guide decision making.

**Complementary and Alternative Medicine Sources:** An approach to healthcare outside conventional medicine.
