**1 Introduction ...................................................................................................................... 1-1**

1 Introduction 

1.1 Purpose of this Document .......................................................................................... 1-1

1.2 Big Hill Enhanced Development Project Overview .................................................. 1-1

1.2.1 Location ................................................................................................................ 1-2

1.2.2 Project Description ............................................................................................... 1-4

1.2.3 Project Purpose ....................................................................................................... 1-6

1.3 Proposal Context ......................................................................................................... 1-7

1.3.1 Population..................................................................................................................... 1-7

1.3.2 Site History ................................................................................................................... 1-7

1.4 Key Issues ................................................................................................................ 1-8

1.4.1 Buffer Distance ........................................................................................................ 1-8

1.4.2 Leading Practice Management and Mitigation.......................................................... 1-9

1.5 Previous Big Hill Development Project EES ................................................................ 1-17

1.6 Profile of the Proponent ............................................................................................. 1-18

1.7 EES Structure ............................................................................................................. 1-18
Table of Contents

2 Evaluation Approach Used in this Environment Effects Statement ..........2-1
   2.1 Coordinated Assessment of the Proposal ........................................... 2-1
       2.1.1 Evaluation Objectives ................................................................. 2-2
   2.1.2 Structure of EES Sections .............................................................. 2-3
   2.2 Approaches to Evaluating the Project ............................................... 2-3
       2.2.1 Systems-Based Approach ............................................................... 2-4
       2.2.2 Risk Assessment and Management Approach .............................. 2-4

3 Statutory Assessment and Approvals Process ........................................ 3-1
   3.1 Introduction ....................................................................................... 3-1
   3.2 Assessment and Approval Requirements for the Project ..................... 3-1
       3.2.1 Environment Effects Statement under the Environment Effects Act
           (1978) ................................................................................................. 3-2
       3.2.2 Technical Reference Group (TRG) .................................................. 3-5
       3.2.3 Requirements under the Mineral Resources (Sustainable Development) Act
           1990 and Associated Guidelines ......................................................... 3-5
       3.2.4 Requirements under the Aboriginal Heritage Act (2006) .................. 3-7
       3.2.5 Requirements under the Heritage Act (1995) .................................. 3-7
       3.2.6 Requirements under the Flora and Fauna Guarantee Act (1988) ....... 3-7
       3.2.7 Requirements under the Wildlife Act (1975) .................................. 3-7
   3.3 Commonwealth Legislation, Policies and Strategies ............................ 3-8
       3.3.1 Environment Protection and Biodiversity Conservation Act (1999) ... 3-8
       3.3.2 National Greenhouse and Energy Reporting Act (2007) ................. 3-8
   3.4 State Legislation, Policies and Strategies ........................................... 3-8
       3.4.1 Catchment and Land Protection Act (1994) .................................... 3-9
       3.4.2 Environment Protection Act (1970) ................................................ 3-9
       3.4.3 Mineral Resources (Sustainable Development) Act 1990 – Associated
           Guidelines ......................................................................................... 3-12
       3.4.4 Planning and Environment Act (1987) .............................................. 3-13
       3.4.5 Water Act (1989) ............................................................................ 3-23
       3.4.6 Wildlife Act (1975) ......................................................................... 3-24

4 Existing Conditions .................................................................................. 4-1
   4.1 Introduction ....................................................................................... 4-1
   4.2 Project Location .................................................................................. 4-1
   4.3 Topography ....................................................................................... 4-1
## Table of Contents

4.4 Hydrology ................................................................. 4-1
4.5 Groundwater .............................................................. 4-2
4.6 Geology ......................................................................... 4-3
  4.6.1 Regional Setting ....................................................... 4-3
  4.6.2 Mineral Resource and Mineral Reserve Summary ....... 4-5
4.7 Biodiversity ................................................................. 4-7
4.8 Land Tenure and Management ..................................... 4-8
4.9 Current Land Uses ........................................................ 4-10
  4.9.1 Mining ................................................................... 4-10
  4.9.2 Public Open Space .................................................. 4-13
  4.9.3 Historic Sites / Features ........................................... 4-13
  4.9.4 Water Infrastructure ............................................... 4-15
  4.9.5 Communications Tower .......................................... 4-20
  4.9.6 Fire Watch Tower ................................................... 4-20
  4.9.7 AARNet Fiber Optic Cable ........................................ 4-20
  4.9.8 Power Reticulation .................................................. 4-20
  4.9.9 Roads .................................................................... 4-21
  4.9.10 Residential Properties ............................................ 4-21
  4.9.11 Commercial Land Use ............................................ 4-21
  4.9.12 Grazing Pasture Land ............................................. 4-21

5 Project Alternatives .......................................................... 5-1
  5.1 Introduction ............................................................... 5-1
  5.2 The ‘No Project’ Alternative ......................................... 5-1
    5.2.1 Implications of the Project Not Proceeding .............. 5-1
  5.3 Underground Method Alternatives .............................. 5-2
  5.4 Open Pit Mining Method ............................................. 5-3
  5.5 Tailings Disposal Options ............................................. 5-3
  5.6 Comparison with the 1999 Proposal ............................ 5-4
  5.7 Consideration of Project Design Alternatives ................. 5-18
    5.7.1 Alternative Open Pit Designs ................................. 5-18
    5.7.2 Alternative Temporary Waste Rock Stockpile (TWRS) Locations 5-21
    5.7.3 Alternative Material Haulage Methods .................... 5-23
    5.7.4 Alternative Haul Road Options ............................... 5-24
Table of Contents

5.7.5 Alternative Communications Tower and Fire Watch Building ................................... 5-27
5.7.6 Alternative Grampians Wimmera Mallee Water Infrastructure options .................. 5-27
5.7.7 Alternative Project Timeframe .................................................................................. 5-29
5.7.8 Summary ..................................................................................................................... 5-30

6 Project Description .......................................................................................................... 6-1
   6.1 Introduction .................................................................................................................. 6-1
   6.2 Overview ...................................................................................................................... 6-2
   6.3 Project Components .................................................................................................... 6-5
   6.4 Project Schedule .......................................................................................................... 6-7
   6.4.1 Scheduled Project Activities................................................................................... 6-9
   6.5 Infrastructure Relocation and Management ............................................................... 6-19
   6.5.1 Historic Monuments and Memorials ..................................................................... 6-21
   6.5.2 Communications Tower and Fire Watch Building .................................................. 6-21
   6.5.3 AARNet Fibre Optic Cable ...................................................................................... 6-21
   6.5.4 Sewer Line .............................................................................................................. 6-22
   6.5.5 Water Infrastructure ............................................................................................... 6-22

Appendices

Appendix A  Letter from Minister for Planning – Need for Environment Effects Statement (23 April 2013)
Appendix B  Environment Effects Statement Scoping Requirements
Appendix C  Letter from the Commonwealth Minister for Environment – EPBC Act Referral (9 December 2013)
Appendix D  Stawell Gold Mines – Draft Work Plan Variation Table of Contents
Appendix E  Environment Effects Statement Consultation Plan
Appendix F  Initial Consultation Summary
Appendix G  Temporary Lookout Concept Drawings
Appendix H  Stawell Gold Mines – Draft Environmental Management Plan
Technical Appendices

Technical Appendix 1  Land Use and Infrastructure Planning Report
Technical Appendix 2  Flora and Fauna Assessment
  – Flora and Fauna Assessment, and Net Gain Analysis
  – Targeted Flora Surveys
  – Biodiversity Impact and Offset Report
Technical Appendix 3  Cultural Heritage Management Plan
Technical Appendix 4  Historic Heritage Assessment
Technical Appendix 5  Acoustic Assessment
Technical Appendix 6  Blasting Assessment
Technical Appendix 7  Air Quality Assessment
  – Independent Technical Review of Air Quality Impact Assessment
  – Air Quality Impact Assessment
Technical Appendix 8  Energy Use and Greenhouse Gas Assessment
Technical Appendix 9  Geotechnical Investigation
Technical Appendix 10  Predicted Dust Impacts on GWMWater Reservoir – Stawell
Technical Appendix 11  Surface Water Assessment
Technical Appendix 12  Groundwater Assessment
Technical Appendix 13  Traffic Impact Assessment
Technical Appendix 14  Landscape Visual Impact Assessment
Technical Appendix 15  Health Impact Assessment
Technical Appendix 16  Economic Impact Assessment
Technical Appendix 17  Social Impact Assessment
Technical Appendix 18  Risk Report
Technical Appendix 19  Rehabilitation Plan
