Temporary Lookout Concept Drawings
Temporary Lookout Concept

Trees to be protected during works (tbc).
Temporary lookout to include:
- information shelter (IS)
- lookout (L)
- picnic table (PT)
Refer sketch details.

Graded gravel pathway (1:20).
Temporary carpark (approx. 12 spaces) to utilize existing entry and crossover.

Notes: Temporary Lookout
A temporary lookout is proposed for the duration of the open cut works. It is proposed to locate the lookout on a natural high point in the northern corner of the site. The lookout is to provide visitors with a vantage point across the site and information on the operation of the mine and the future rehabilitation of the site.

Details:
1. It is proposed to construct a graded access (1:20) from a temporary carpark located at the Main Street (12 car spaces are proposed). The track will be constructed from local gravel.
2. A park shelter is to be installed with information boards for the mine information. The park shelter can be re-used on site or elsewhere following completion of the project.
3. A picnic table is to be provided within the shade of the existing trees. The existing trees will be protected during the works and the site re-grassed on completion of the project. The furniture can be retained on site or used elsewhere on completion of the project.
4. A simple steel lookout accessed via stairs is to be constructed and located adjoining the site fence. Final design subject to Engineering and geotechnical evaluation.
5. A mural wall is proposed for sections of the mine fence featuring artworks from local school groups. Stawell's mining history is suggested as one of the possible themes.
